

Fullstack Developer

Rephael Sintes

rephael4321@gmail.com | 053-823-4329 | Center District | [LinkedIn Profile](#) | [Portfolio](#)

Summary

- Entry-level frontend engineer with hands-on production experience building performant, scalable systems using modern JavaScript/TypeScript stacks
- Currently interning at **Run My Docker** (SaaS startup) – contributing to real backend and infrastructure code shipped to users
- Built multiple full-stack applications independently, used in production by paying customers
- Passionate about developer experience, clean code, and creating systems that scale well and are easy to maintain
- Fast learner, highly collaborative, and driven to build tools that make a real-world impact
- Deep understanding of how to take features from idea to release across the frontend lifecycle

Projects

- **Run My Docker – Internship**
SaaS platform for deploying Docker containers from docker Hub and GHCR to AWS EC2 with a few clicks via web GUI
Tech stack: Docker, AWS EC2, Java Spring Boot, PostgreSQL, RabbitMQ
[Website](#)
- **Neura Query – Personal Project**
AI-based system for querying and modifying SQL online databases via natural language interface
Tech stack: Python, OpenAI, SQL, FastAPI, React NextJS, Docker Compose, Kafka
[Website](#)
- **Ice Cream Online Store – Paying Customer**
Full-featured ecommerce platform for an ice cream business with admin panel and CMS
Tech stack: React NextJS, Neon DB, Type Script, Vercel
